

# Whitesales CPD Information

*“Great presentations delivered  
with enthusiasm & backed up  
with deep knowledge”*

Buller Welsh

Ian Smales, CPD Presenter

# Whitesales Continuing Professional Development Presentations

Whitesales offers **two** separate 45 minute seminars:

- Designing Daylight in the Built Environment
- Smoke Ventilation and its Importance and Regulation

More information about the content of these presentations is available on the following pages.

These are free of charge presentations, presented at a date, time and location that suits you and your colleagues. A complimentary lunch can also be provided.

*“Very knowledgeable and enthusiastic presentation...Helpful and detailed information”*  
**HLM Architects, London**

*“Really interesting content, very helpful and comprehensive”*  
**Rafael Vinoly Architects, London**

*“The presentation was really clear, to-the-point and very informative.”*  
**Skidmore, Owings & Merrill, London**

*“Very good and clear presentation”*  
**PM Devereux, London**

*“Technically informative and insightful with a good balance of technical facts and products”*  
**Sutton Griffin Architects, London**

*“Very informative and enjoyable”*  
**Farrells, London**

# Designing Daylight in the Built Environment

This seminar highlights the importance of natural light for buildings and occupants, as well as the general principles of daylight. It also advises on the design considerations involved and options available when incorporating rooflight systems into the built environment.

- Provides an understanding of the importance of natural light in different environments
- Discusses the principles and efficiencies of daylight and where it is required in regulations
- Identifies different rooflights and their applications
- Explores other benefits and uses of rooflights and associated products
- Allows time for questions and discussions on the topic

If you would like more information or would like to book a seminar, call 01483 271371 or email [cpd@whitesales.co.uk](mailto:cpd@whitesales.co.uk)

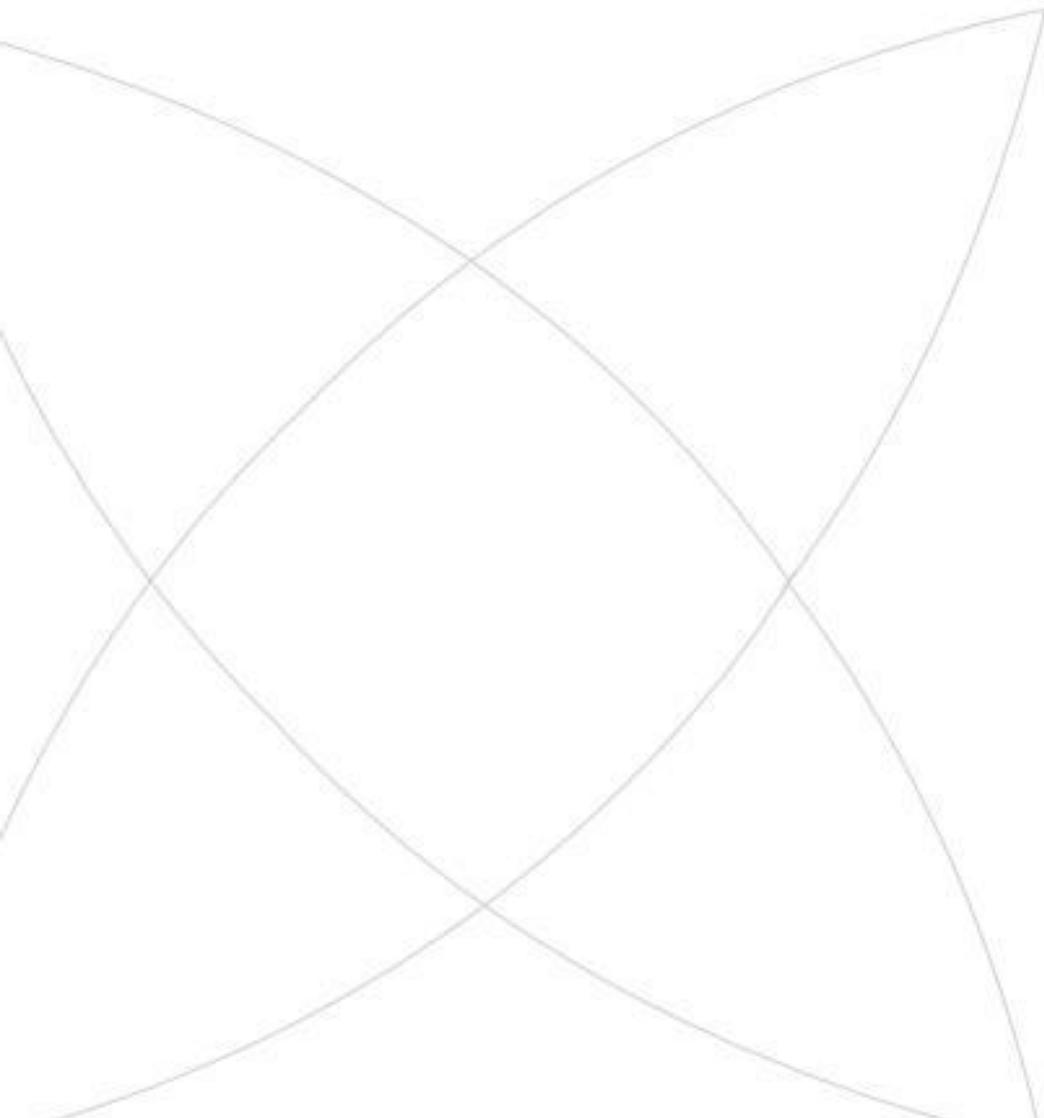

# Smoke Ventilation and its Importance and Regulation

This seminar highlights the importance of smoke ventilation for buildings and occupants, as well as the regulations that govern compliance around the topic. It also advises on the design considerations involved and options available when incorporating smoke control systems into a building.

- The history of smoke ventilation
- Why is smoke control provided?
- Principles of smoke control
- Mechanical V Natural
- Applications
- Certification, legislation and guidance
- Associations
- Design, installation, commissioning and maintenance of smoke control systems
- Product Specifications
- Allows time for questions and discussions on the topic
