LOCHRIN FlatGUARD™

THE LOCHRIN® FLATGUARD™ WELDED MESH SYSTEM IS IDEAL FOR USE IN APPLICATIONS WHERE SECURITY IS REQUIRED BUT WITHOUT AN OBSTRUCTIVE AND INTIMIDATING BARRIER. IT IS DESIGNED TO BE A STRONG YET RESILIENT FENCING SYSTEM, CAPABLE OF BLENDING INTO ITS ENVIRONMENT AND ENHANCING THE SURROUNDINGS. IT IS THIS KEY FEATURE WHICH PROVES POPULAR WITH ARCHITECTS AND SPECIFIERS ALIKE.

PANELS

FlatGUARD Panels are constructed using a 6.0mm vertical wire and twin 8.0mm horizontal wires which result in a very strong mesh and stable fence. FlatGUARD Lite Panels are also available, incorporating a 5.0mm vertical wires and twin 6.0mm horizontal wires. The mesh aperture consists of 200mm x 50mm spacing, providing excellent see through visibility. Panel widths suits post centres of approx. 2500mm.

POSTS

FlatGUARD posts are manufactured from 60x60mm RHS steel. Threaded inserts are then fitted to take a specially designed security bracket, giving resistance to vandalism and attempts to force entry. The welded mesh panels are located on the face of the post with clips fixed with 'Lochrin anti-tamper' bolts. These clips firmly clamp the end vertical wires, providing a secure fixing.

FINISH

Standard finish is polyester powder coated Green RAL 6005. Hot dip galvanised only, or alternative colours are available on request.

APPLICATIONS

The Lochrin® FlatGUARD system is suitable for use in most applications where general security is required, such as schools, commercial units, hospitals etc. to create a general physical barrier.

TYPE	PANEL HEIGHT	NO OF CLAMPS PER POST
Lochrin® FlatGUARD 1000	1030mm	5
Lochrin® FlatGUARD 1200	1230mm	6
Lochrin® FlatGUARD 1800	1830mm	7
Lochrin® FlatGUARD 2000	2030mm	7
Lochrin® FlatGUARD 2400	2430mm	8
Lochrin® FlatGUARD 3000	3030mm	10
