

Telescopic Traffic Stopper

This bollard stands 660mm above ground with a 120mm box section, making this Telescopic Post a larger, stronger and more substantial version of the Telescopic Mole Post.

The Telescopic Traffic Stopper has a hot dipped galvanised finish and locates into a socket embedded in concrete. It's a simple, strong bollard that gives great accessibility and security to our customers and is ideal for protecting car parks, driveways or any other public parking spaces, or for cordoning off areas.
