

Anti Ram Raid Post

This Anti Ram Raid Post has a hot dipped galvanised finish, widely used in protecting warehouses, shops, stores and property. The post locates into a socket embedded in concrete. The Post has been approved by Police and Local Government Authorities and recommended by insurance companies.

To raise and lower the unit, a key is used, and it is secured by a padlock (supplied at extra cost) placed inside the flanges to make it difficult for access. The Anti Ram Raid Post can be removed and replaced if needed in case of any damage or needs servicing.

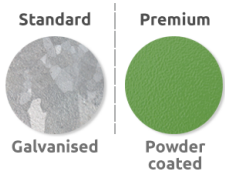

H: 950mm x Weight: 35Kgs
