

Cycle Clamp

A popular and extremely cost-effective way of accommodating cycles and mountain bikes due to its 50mm tyre width, the Cycle Clamp is a wall or post mounted cycle clamp that is now available with a pivoting bracket. Constructed from solid round bars with a galvanised finish (fixing bolts not included).

This cycle user needs a secure area to store their cycles: and will be providing this through this durable product which offers just that. There is a real need for outdoor spaces to provide the areas and products to ensure increased security for cycle owners, and this Cycle Clamp allows you to do this.

D: 50mm
