

BESPOKE LOGOS

Celino's Project

Celino's, an East End Glasgow bistro asked us to create 5 barrier planters with their logo prominent on the side. There was just one stipulation – no vinyl, this had to be done the traditional way, sign written by hand. Fortunately this is our speciality. Three different coats of paint applied over several days to create a multi-coloured frame and banding before the most delicate stage was upon us. Using great skill and artistry our sign writer was able to complete each logo within 3 hours to the delight of one very satisfied customer.
