# Bunded Chemical Storage Tanks

Bunded tanks are designed with pollution control in mind, selected for integral protection from leakage and overfilling.

Containing a minimum 110% volume of the inner tank, a bunded tank is a 'tank within a tank', which help conform to current health and safety legislation.

Enduratan bunded tanks are manufactured to the highest specifications from UV stabilised polyethylene. There are many benefits of installing these tanks, which include easy installation on a flat concrete base, and easy re-siting. Corrosion-resistant plastic ensures no rusting.

Available in a range of colours, these tanks can be colour coded to enable easy recognition as to where each chemical is stored.

## Modifications and Accessories

Providing solutions to custom tank requirements, Enduratanke are able to offer its experienced assistance.

Our dedicated Modifications Team works closely with our Technical Sales Team to achieve solutions that meet capacity, duty and integration requirements with proven modification methods and practices.

Butterfly Valve

PN 16 Flange

Mushroom Vent

Bund Sight Gauge

Tanker Fill Point

Bolted Outlet

Male BSP Adapter Nipple

Female BSP Adapter

620mm Side Access Manway

# Chemical Dosing Tanks

Our range of chemical dosing tanks offer a simple and effective solution for small dosing applications.

Available in sizes 120 – 2000 litres these tanks are specially designed to enable easy mounting of dosing pumps.

To provide an easy and quick visual level indicator inside the tank, moulded litre graduation lines have been incorporated on the tank in natural polymer.

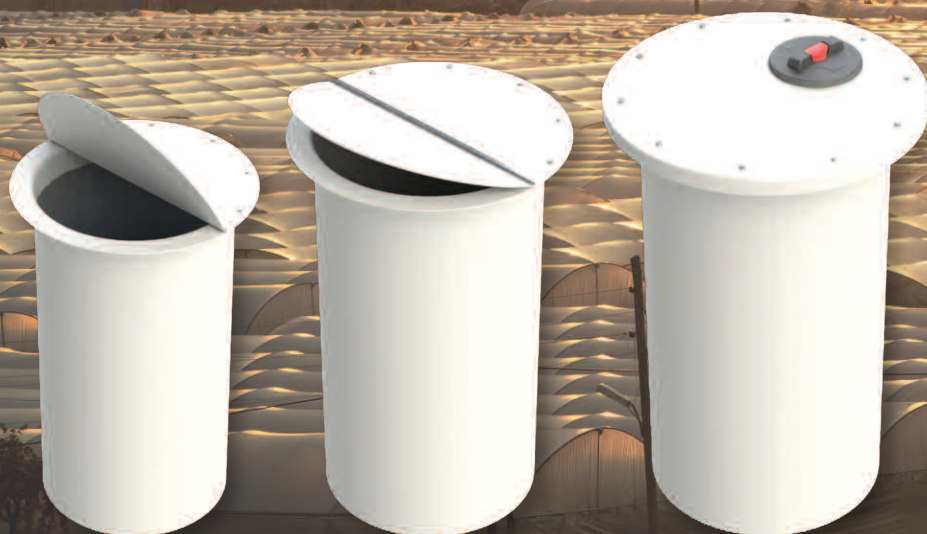

**Available  
in sizes from  
120 litres to  
2000 litres**

# Batch Tanks

Designed especially for indoor applications, these tanks are perfect for batch chemical and mixer mounting systems. All tanks feature 8" lids and have one standard fitting. Metal stands are available for the vertical batch tanks. Tanks are manufactured from food grade, UV stabilised polyethylene and are designed for the containment of liquids up to 2.0 specific gravity.

Tank walls are translucent for level viewing and equipped with litre and gallon indicators.

# Vertical Industrial Tanks

Endurataank's industrial tanks can be manufactured to hold chemicals and liquids with specific gravities of up to 2 SG.

Available in 22 sizes ranging from 500 litres to 30,000 litres, these tanks have been engineered and constructed in one piece, with no joins or seams, eliminating the requirement for centre support poles.

Our tanks are made from the highest grade materials and the latest in rotational moulded UV stabilisation technologies, ensuring excellent chemical resistance.

The high specification design of every product, guarantees the exact solution to any requirement.
