

Via bench

VIA consists of straight and curved bench modules that can be installed either individually or joined together in rows, formations or circles. The bench can be supplied in a free-standing version or for installation on wall tops.

VIA is available with low-energy LED underlighting. This creates an atmospheric look and reduces the need for other, more obtrusive lighting in parks and communal areas. The fitting is completely concealed and invisible in daylight.

The steel details are hot-dip galvanised (901) and designed for long-term use. Choose from nearly 200 different RAL colours for powder coating (900). The BLOC litter bin is also available in stainless steel (902) and COR-TEN (Corten) steel (903). All screws and fittings are supplied in acid-resistant or stainless steel.

Net price from 1,400 EUR

Products with wood comes with linseed-oil-impregnated PEFC-certified pine from Scandinavia. Hot-dip galvanized and powder-coated standard products with wood can also be supplied with Kebony Radiata®. Oiled oak or ash recommended indoors. Other types of wood are available on request.

The VIA curved bench seat is only available in moulded plywood.
