VIO SOLAR
Solar Series

 **acrospire**
Products Ltd

The new Vio Solar solves the problem of unlit pathways with an easy to install, "off grid", lighting solution. The neatly integrated solar panel, light sensor and battery provide up to 20 hours lighting off a full charge. Manufactured from the highest quality materials all sourced in Britain.

Features

- LED illumination
- Top mounted solar panel
- Internal battery unit
- Up to 20 hours lighting off a full charge
- Lightweight aluminium construction
- Bolt down base as standard
- Optional bolt on root (if required)
- Black paint finish as standard

Benefits

- An "off-grid" solution, negating the need for extensive civil works or costly connection to the main grid.
- Power to run all night
- No running costs
- Zero maintenance system
- Modern, elegant design aesthetic

Specification

Material

Bollard - Cast LM6 aluminium
 Lens - Frosted polycarbonate
 Mounting - Flange or root mounted

Optics

CREE LED

Power

Battery Type: Lithium Ion

Finishes

RAL 9005 Black

Ingress Protection

IP65

Impact Resistance

IK 10++
