

Specification Sheet

Product Name: INFINITY BOWL

Product Code: IP20

Product Activities: Spinning whirl motion

Product Features: Low level accessibility, high visibility finish

The Inclusive Play Infinity Bowl is a playground must have! The Infinity Bowl is a rotating bowl that spins on a single point axis at an incline of 14 degrees.

Designed for ease of transfer the low level access is ideal for those being transferred from a wheelchair or pram. The angle and lip enables older children to transfer in and out of the bowl more easily. For smaller children the bowl can be pulled to the lowest point for ease of access.

Suitable for one older child or two toddlers, the deep bowl provides security and comfort to those who need the extra support to sit up. The spinning sensation created by the bowls movement can enable children to acquire or improve their body control and synchronise their movements.

The Infinity bowl is galvanised and powder coated to BS EN13438:2005 standard and includes a silver sparkle effect giving a durable, high quality finish.
