

Ashbery Pedestrian Light

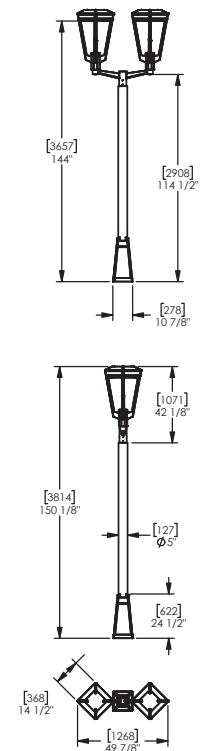

Ashbery is a trio of lights that brings together advanced LED technology and optics, paying homage to traditional-style lights. The range has been created in collaboration with Robert A.M. Stern Architects, celebrated masters of modern traditional design, and Fisher Marantz Stone, an internationally recognised award-winning lighting design agency. The pedestrian light is offered in 3700mm, 4300mm and 4900mm heights and is ideal for campuses, parks and plazas, helping to create public spaces that are usable 24 hours a day. Options include single luminaires or a double-mount option for dual luminaires, one on either side of the pole. Patent-pending glare control requires less eye adaptation, enabling lower light levels and lower energy use with excellent visual acuity, while tenon-mounted luminaires can be retrofitted on site.

Specification:

Materials:
Post - cast aluminium

Dimensions

H: 3700mm
W: 278mm
D: 278mm

(Technical Drawings for variants available on request)
