

Select Recycling Bin

This modular system of steel recycling units designed by industrial designer Brian Kane provides a choice solution for upscale settings with multiple choices of its own. Engineered and built for outdoor use, the well-proportioned Select elements are entirely at ease indoors as well. Heavy steel construction and 95L capacity make them stronger, more resilient and more capacious than the competition. Hidden hinges and handles, flanged doors, and cast aluminium trim rings lend an unusually refined appearance. Select one, two or three units in plain or perforated steel, mix and match a wide range of powder coated colours, and pick from an array of plates to label content configurations of your choice.

Specification:

Materials:

Heavy Steel construction with cast aluminium trim rings.

Finishes:

Panguard II powder coated.

Fixings:

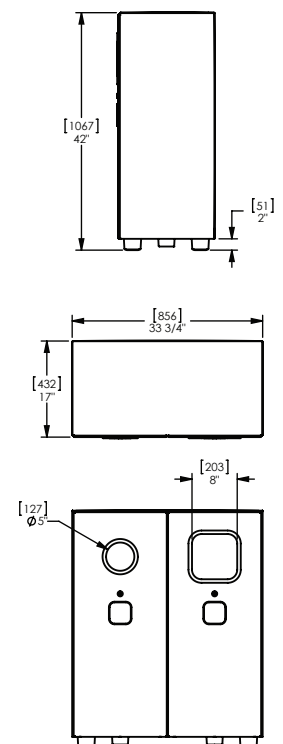

Free standing. Surface mounted.

Dimensions

H: 1067mm

W: 856mm

D: 432mm
