

## STRATA Table

The STRATA Table is a six-sided element, asymmetric in its geometry and open at the ends. The table partners with the STRATA bench to create site-specific configuration, these can be grouped together in cell-like structures anywhere in the chosen setting. In addition to its usual function as a useful surface, it helps define seating relationships, breaks up space, and can be used to create seating islands.

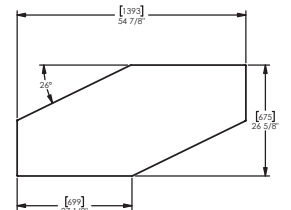

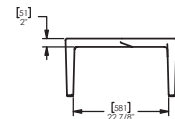

### Specification

#### Materials

Table - ultra high performance concrete (UHPC)

### Dimensions

H: 351mm  
W: 1393mm  
D: 675mm
