

Loop Cone Backrest

Loop Cone is a multi-purpose unit. When positioned in the middle of a Loop, it becomes a backrest with the option of becoming a central planter. On its own the Loop Cone becomes a self-contained up or downward facing planter.

The mould is sandblasted to provide a rough surface to enhance the friction and makes the surface comfortable and safe to use.

The material is suitable for recycling.

Specification:

Materials:

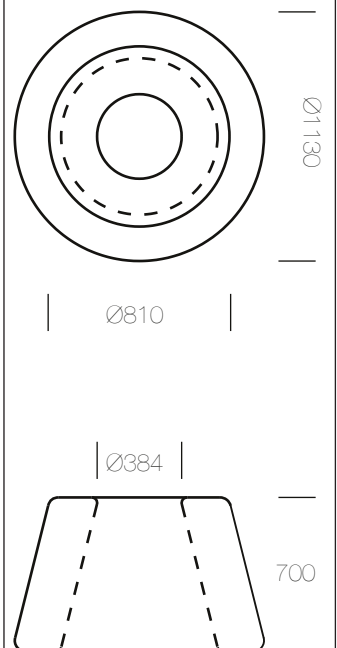

Rotation moulded polyethylene

Fixing:

Surface Mounted or fill with water/sand

Dimensions

Dia: 1130mm
H: 700mm
