

Bernie Stool

Bernie is the tall seating element in the UrbanEdge family. This bar-height chair teams with the Jessie rail and steps up to the occasion. With its relaxed oval-shaped seat, with or without a comfortable curved-band back, it rotates a full 360. Bernie is ideal for bar or cafe settings where it helps activate social space. And it offers an interesting alternative for seating with an elevated perspective along rail-defined boundaries on the streetscape edge.

Specification:
