

Generation 50 Seat

The Generation 50 Seat has many applications due to a flexible ensemble of style and mounting options.

Generation 50 benches are 1829mm long and available with or without a back and with curved or straight timber slats. Three arm rest styles provide aesthetic and functional choices; benches are also available without arm rests.

Available with four different leg fixing options; traditional, cantilevered, top-of-wall mounted, and wall-mounted. The cantilevered and top-of wall bench is mounted or embedded, and the wall-mounted bench is surface mounted.

Benches for outdoor use are available in ipe, jarrah, and domestically sourced, thermally modified ash that weathers to a soft pewter gray.

For indoor use, the bench is available in jarrah and domestically sourced, thermally modified ash with a clear, catalysed acrylic lacquer finish.

Cast aluminium supports have a powdercoat finish.
