

Windmark Table

Windmark tables are offered with an aluminium strap base, allowing the peaked profile of the strap base to lift the metal off the ground, minimising corrosion and visually complementing one another, so tables and chairs work beautifully together. Windmark tabletops come in a choice of rectangular, square or circular shapes, in timber, glass or polyester powdercoated steel. Tops have tapered edges that suit the most refined settings. The combined use of aluminium and steel material imparts visual lightness with structural strength. The work of a master architect who understands furniture and space, Windmark is another inspired Landscape Forms solution for helping designers create a sense of place.

Specification:

Materials:

glass; powder coated steel; timber.

Finishes:

Pangard polyester powdercoat.

Fixings:

Free standing. Surface mounted.

Dimensions

Round

H: 738mm

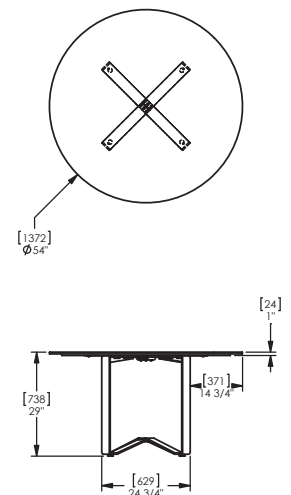

Dia: 1372mm

Square, Rectangle

H: 738mm

W: 1065mm, 2440mm

D: 1065mm, 810mm
