

Cyclus Cycle Stand

The Cyclus cycle stand doubles up as a bollard as well as a cycle stand. It is manufactured entirely out of cast aluminium and is made up of a central post and two half-rings fixed with stainless steel anti-theft screws. The ground fixing option is either through concreting-in the internal steel post, fixed sideways to the structure with stainless steel anti-theft screws. Also available with a surface mount option with hidden bolts through a base plate to secure the cycle stand.
