

Mikado Cycle Stand

The Mikado cycle stand can also be used as a bollard. The bollard is manufactured from steel tube which is closed at the top by a 3mm flat sheet. The Mika has the option to be ground fixed due to a concealed device which can be bolted or concreted-in. The peculiarity of this bollard is its appearance, with six holes at various points which gives it an attractive appearance, they can also be used as a bike stand by securing chains and locks through the holes. The whole structure is hot zinned and polyester powder coated.

Specification:

Materials:

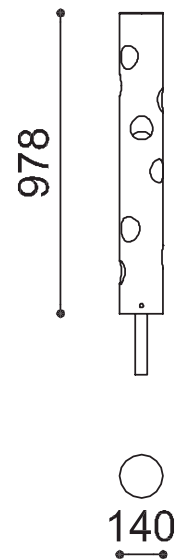

Galvanised and Powder Coated Steel.

Fixings:

Ground fixing bolted or concreted.

Dimensions

H: 978mm
Dia: 140mm
