

Duplus Information Post

The Duplus information post is constructed from one or two vertical elements in two diameters and two heights. It is manufactured entirely in aluminium but with a steel internal post. Ground fixing method is conducted by concreting-in the steel post. The flag model, for stability reasons, can hold up to a maximum of 3 boards, whilst the model with two supports can hold up to 5 boards. All fixings are stainless steel.

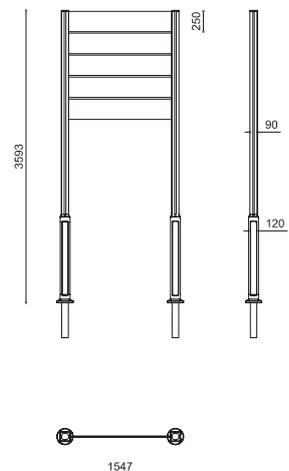

Specification

Materials

Post - aluminium

Dimensions

H: 3090/3593mm
W: 1422/1547mm
D: 120mm
