

Mo

The Mo Cigarette Bin is made up of 120x120mm square section, made of 8mm-thick and 1000 mm-high steel plate with a 250x250x8mm base plate. The central part is closed by two 2mm thick stainless steel shaped plates that due to the sloping ends, enable you to put out and dispose of cigarettes in the lower part. Inside this there is a circular container that can be extracted through a front panel with a triangular key lock. It is fixed to the ground with steel wall plugs (not included). Available in both hot galvanised steel and polyester powder coated and weathering steel with sandblasting and oxidation cycle developed by Metalco. All screws are stainless steel. Pre-drilled for anchors.
