

Arts Shelter

The Arts Shelter is constructed from 135mm diameter special profile extruded aluminium bearing columns with thin vertical stripes, with 15/10mm thick steel base plates, connected at the top by an extruded aluminium profile which acts as a gutter, all polyester powder coated. The cantilevered roof is in 4mm thick transparent sheets. The shelter is provided with a 40mm diameter tubular stainless steel handrail which is fixed to the rear columns. The shelter can be supplied complete with: side walls in glass or perforated steel sheet, polyester powder coated steel or stainless steel bench, rear notice board, advertisement side wall; extruded aluminium front sign; lighting unit.

Specification:
