

## Cabinedda Shelter

Collection of shelters composed of a bridge-shaped steel structure, covered externally and internally by Corten steel sheets. Available with internal coating in panels in Okumé plywood. The back walls are made of coupled and tempered glass. The shelter can be completed by single-seater seats to create a waiting area and a LED lighting system, integrated in the lower wall of the roof.

### Materials

Corten steel, Okumè wood

### Dimensions:

L: 4570mm  
D: 2285mm  
H: 2515mm

(Technical Drawings available on request)
