

Caring Island

Outdoor structure consisting of two different functional areas. The first is equipped with a circular shading structure, a semicircular panel that protects both a top, that serves as a changing table, and a system of seats with backrest, dedicated to breastfeeding. The area is equipped with two steel structures that serve as parking for prams and strollers. The second area is equipped with vertical decorative elements, a circular fence that identifies a protected play area for children and a system of stools and a round table for children.

Materials

Powder coated steel, Okumé plywood

Dimensions:

L: 5400mm

D: 4820mm
