

## Garda Shelter

Collection of bike hub composed of steel tube structure and expanded metal sheet covering panels. The hub is equipped with a door, whose closure is protected by a customisable access control system. Two models are available: one with steel sheet roof, the other designed to accommodate a green system (not included). The structure is always equipped with LED lighting.

### Materials

Powder coated steel

### Dimensions:

L: 5285mm  
D: 2090mm  
H: 2755mm

(Technical Drawings available on request)
