

Sintesi Shelter

Modular shelter composed of a load-bearing structure in steel profiles, a back wall made of tempered glass sheets which connects to a coupled and tempered glass cover through an aluminum profile. The shelter can accommodate a LED lighting system, a steel bench with or without backrest and it can be completed with tempered glass side wall or with an autonomous side wall, composed of a steel frame with integrated display board.

Materials

Powder coated steel, glass

Dimensions:

L: 2840/4190mm
D: 1750mm
H: 2553mm
