

Cloverleaf

The idea behind Cloverleaf is a composition of modules twisting and unfolding to create a clover. The backrest in the middle of each module winds across the seating, providing back-support while shielding users from those on the other side.

Cloverleaf constitutes a beautiful sculpture - with or without people - suitable for a range of spaces including corporate buildings, squares, terraces, lobbies etc. Cloverleaf is multidirectional and has no front or back, optimizing space by provide seating on both sides. There are 4 different modules available: left / right end modules and angular / straight middle modules, which combine to offer numerous different bench designs.

In 1970 Verner Panton launched a sofa that still draws attention to this day. This highly characteristic piece is now launching for outdoor use in cooperation with Panton's widow Marianne. Cloverleaf consists of modules with an infinite number of possibilities for creating long, winding or (as indicated by the name) clover-shaped formations. The high level of comfort combines with durable polyethylene to give Panton's iconic design a new lease of life outdoors.

Dimensions

Left/right end module:

L: 1145 mm
D: 1155 mm
H: 800mm
Seat: 400mm

Angular middle module:

L: 1420 mm
D: 1580 mm
H: 800mm
Seat: 400mm

Straight middle module:

L: 1300 mm
D: 1130 mm
H: 800mm
Seat: 400mm

Angular middle module
(H: 80 / seat: 40)

Left end module
(H: 80 / seat: 40)

Straight middle module
(H: 80 / seat: 40)

Right end module
(H: 80 / seat: 40)
