

## Profile Bollard

Designed in collaboration with award-winning lighting designer Linnaea Tillett and Tillett Lighting Design Associates, the Profile family of lights creates beautiful and intentional light emanating from a refined, minimalist design. Profile bollards can be used to define boundaries and subtly light pathways.

The 914mm-high performance bollard is available with a single- or dual-mounted light and Type 4 distribution. The wayfinding bollard has a grazing light that illuminates the recessed channel of a 622mm- or 914mm-high bollard.

Profile bollards are offered with 2700K, 3000K, 3500K, and 4000K color temperatures, standard output, and diffused lens. An unlit 610mm- or 914mm-high perimeter bollard is also available. Profile bollards are surface-mounted and are available in a full color palette and finished with proprietary Pangard II® HAPS, VOC, and lead-free polyester powdercoat.

### Materials

Pole: Aluminium  
Light: LED

### Dimensions:

W: 165mm  
H: 914mm / 622mm  
D: 165mm / 231mm / 300mm
