

HANDSPRING DESIGN

Youth Shelters designed exclusively for All Urban

Twisted Youth

This functional modular shelter represents an evolution of Handspring Designs 'Twisting Frame' structure.

A contemporary, modular shelter, the Twisted Youth shelter has various cladding options, all elected to provide weather protection, colour, shade and great visibility.

Materials and finishes

Constructed from seven 150 x 150mm UK FSC Douglas Fir frames, slotted into a galvanised steel box section base frame. Seating is then provided down each side and at one end.

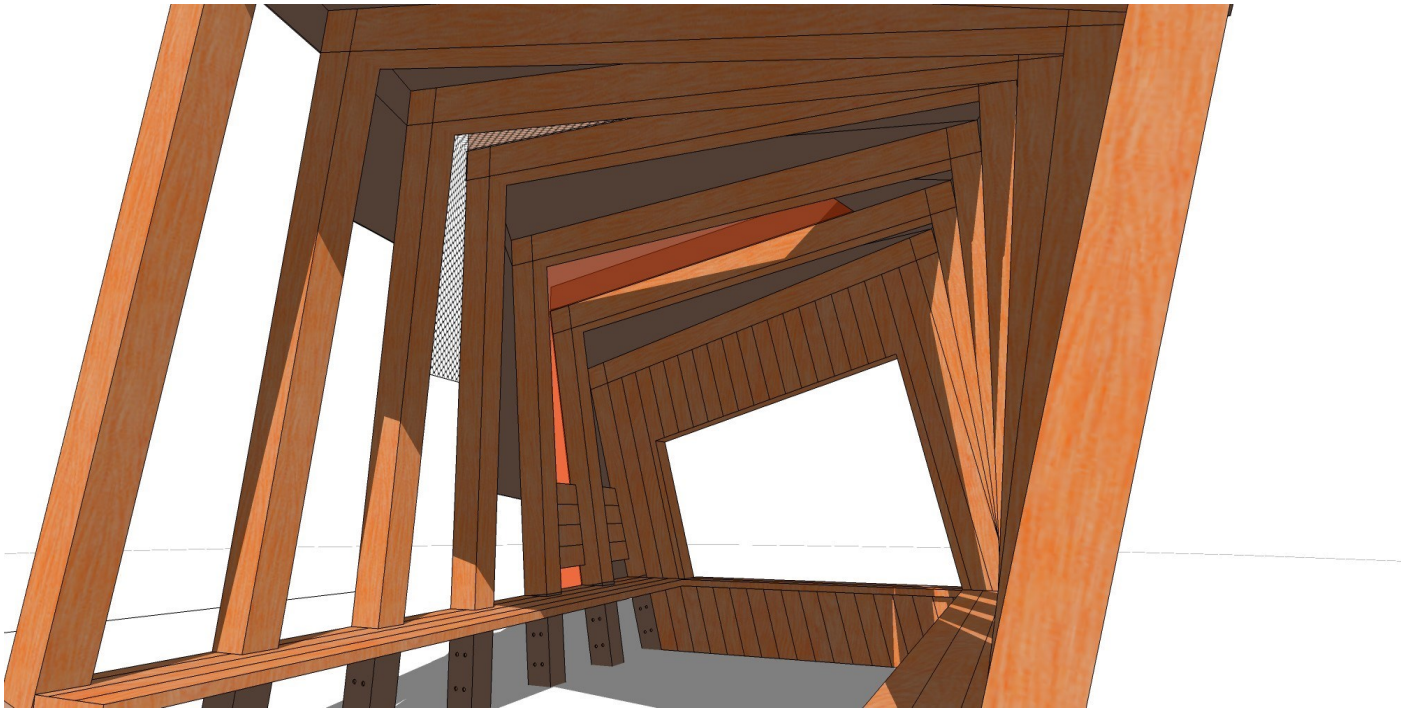

The structure is clad in various materials to provide weather protection, colour, shade and views. The roof can be galvanised sheet metal, timber, acrylic or topped with a wildflower meadow.

Installation and maintenance

Installation required onto level, flat sub-base with final surfacing applied afterwards, foundations are not necessary.

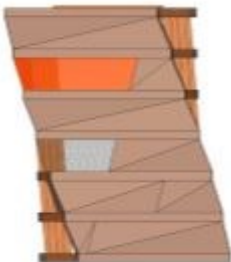

Dimensions

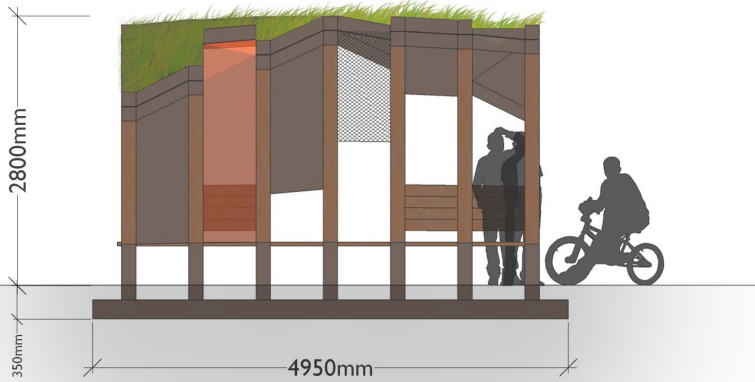

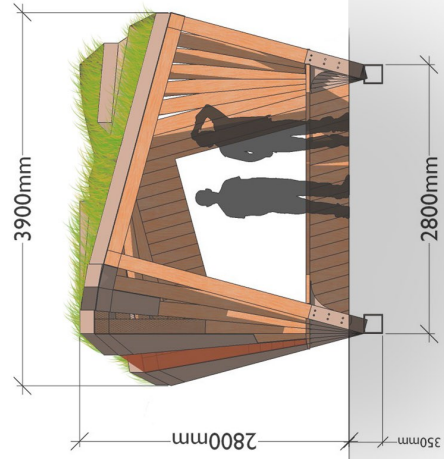

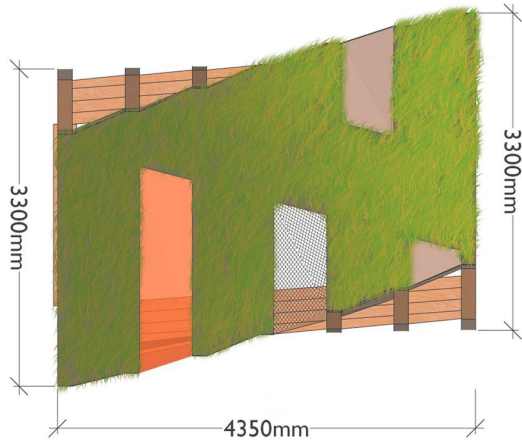

Width	3900mm
Depth	4350mm
Height	2800mm

Roof material options include:

- Steel
- Timber
- Acrylic (any RAL colour)
- Greenroof / Wildflower
