

CASE STUDY

TVS PU-Sport

Newcastle Academy, part of The United Endeavour Trust

PROJECT INFORMATION

Scope of Works

After more than a dozen years of intensive use, the flooring of Newcastle Academy's sports hall was showing its age. TVS addressed areas of localised damage and sanded the floor to create better layer-bonding – all in preparation for a rapid flooring makeover.

Next TVS installed a new, self-levelling and seamless polyurethane performance wear layer. It was finished with a new sports grade polyurethane topcoat in RAL 7000 'Squirrel Grey' designed to give the sports hall a more updated look.

Then, following discussions with the Academy, priority sports were identified and a customised line marking plan agreed for the compact sports hall. Finally, brand new, extra wide cover details were supplied and installed to ensure protection at all points of entry.

The total installation took just 5 days and delivered an instant transformation. For those looking to update, replace or refurbish sports facilities after a decade or more of use, this project underlines the distinct advantages of selecting TVS polyurethane sports flooring, namely:

- No necessity to fully remove the existing sports flooring, saving time and expense
- No need to re-screed the subfloor or install new shock-absorbing layers

Providing existing surfaces still perform to required standards, TVS can rejuvenate surfaces with a new hard-wearing polyurethane layer that transforms its appearance and provides significant time and cost savings.

Date of Completion

September 2020

"This is our first time working with the team at TVS Group and its safe to say it certainly won't be the last!

From start to finish we have nothing but praise for the great level of communication, professional advice and guidance we received from the onset of this project. What we found to be particularly helpful was the number of questions and communications that took place to ensure we had the right installation for the Academy, that the specification met with Sport England criteria and, as importantly, that our students and community groups would have an exemplary sports facility available to them.

Pre contract health and safety information was provided timely and without issue.

The installation team worked fantastically and from a contract management perspective were excellent to work with.

Post installation we were provided with the O&M manual.

The installation itself is fabulous and our students and staff are amazed at the transformation of the sports facility in just a small number of days.

We look forward to many years use of our fantastic new facility!"

Vickie Keeling, Trust Director
