PUNTO PARKOUR

Multifunctional sport equipment for parkour

What is parkour?

Parkour is a physical discipline that is based on fast moving and clearing the obstacles by using jumps, running, pull-ups and other equal elements in urban environment. The founder and leading pioneer of the Parkour, David Belle, conceived the main idea of this discipline “There are no limits, just hurdles and every hurdle can be cleared.”

What is the profit of parkour?

1. Today parkour is a fancy sport discipline. One of the most spectacular and effective forms of healthy living and also popular way of self-expression.
2. Develops stamina, gives workout for all ground of muscles.
3. Instructs fall down without injuries, even from high height.
4. Helps in honing twisting elements that can be useful in other sports like wakeboarding and snowboarding.
5. Develops body reactions. Trains assess quickly the situation and make decision.
6. Teaches commitment to your body.

What is PUNTO PARKOUR?

It is sports equipment aimed for parkour training in public places. We are who came up with elements that will help to master the parkour technique comfortably and risk free for your health.

The whole sports ground is designed according to the international standard DIN16899-2018. Parkour elements have nonslip coating and the sports ground must have special rubber covering.

The advantages of PUNTO PARKOUR

Flexibility

Several options of parkour grounds permit installation even in small spaces according correct and secure spacing to each other according to the international standard DIN16899-2018.

The equipment provides something special for every skill level and situation. There are a lot of different angles, different types of the surface for the jumping, letdowns and balance that also correspond to the international standard DIN16899-2018.

Materials

We use nonslip HPL-plastics that fit the standards for parkour grounds.

The advantages of PUNTO PARKOUR

Attractive design

We worked out the kinks of the design and we are ready to offer you different color scheme for parkour grounds. This permit it`s installation in virtually any project. The letters are made in grey colour grade that is unique feature of the material, while the fitting pieces can have random colors. Also there is an option to make individual letters illumination.

Regarding letters elements – besides letters that composes the word “PARKOUR”, we provide you all letters from Latin and Cyrillic alphabets.

Is PARKOUR safe?

- The parkour ground is designed according international standard DIN16899-2018. All elements are made in accordance with these standard requirements. The distance between objects and its altitude are more than adequate for skipping and acrobatics training.
- Parkour training is inextricably linked with skipping and acrobatic skits. This false opinion is set in our mind due to the cinema and social media. Practically all dangerous knacks trained on the special ground are as danger as bicycle ride.
- Risk assessment also is very important and useful part of the parkour training.

Is PARKOUR safe?

All holes in elements are made up to security standard DIN16899-2018

There are no “ears” and other elements on the pipe joints that can cause cervical vertebrae infractions
