Sovereign Wall & Floor Mounted LST Radiators

Designed to combine
safety and style

Combining sleek design and functional usability, these convectors-with lamella heat exchangers-have been manufactured for office and sales areas, car showrooms, hotels and other public buildings.

With their simple and effortless design, the Sovereign Wall and Floor Mounted radiators provide an elegant substitute for standard panel radiators.

Reducing thermal inertia when heating, the Sovereign range reacts quickly to ambient temperature fluctuations caused by accidental heat gains such as sunlight, high traffic of people and electrical appliances.

Product Benefits:

- Safe corners and edges to provide an extra element of safety in the event of a slip, trip or fall.
- Energy efficient heating due to low water content.
- One-piece construction for robust design, providing longevity.
- Multiple choice of colours available so that you can customise to suit your individual styling requirements.
- Sleek and stylish design that blends seamlessly into your building's decor.
- A choice of 'slot' or 'hole' grille design.

*Watts based on Delta T50 75°/65°/20°

Colour

Contour LST radiators are bespoke and made to order, meaning that no two jobs are the same. You are empowered with complete control of the colour of your low-surface temperature radiators, suiting your designs and environments without compromising quality or lead time.

Working from a RAL chart, Contour are able to provide almost any colour LST radiator, meaning that we can match whatever colour scheme you need your LSTs to match. Below are some mock up examples to show you the possibilities with colour.
