

Re-flow LANDSCAPING

Mobile job management software for landscapers

With Re-flow mobile job management software, you can centrally control your jobs on location and achieve outstanding workflow management.

Our desktop dashboard gives you powerful job command functionality, and in the field, our ultra-stable app won't let you down.

As your workers complete tasks and information, data comes back to the dashboard, instantly highlighting what's been accomplished.

"I just can't imagine there's an industry with workers out in the field that wouldn't benefit from this software. I would recommend Re-flow to any contractor that was looking for a better way of recording their data in a quick and easy way."

Oli Hemson
Commercial Manager, Tony Benger Landscaping

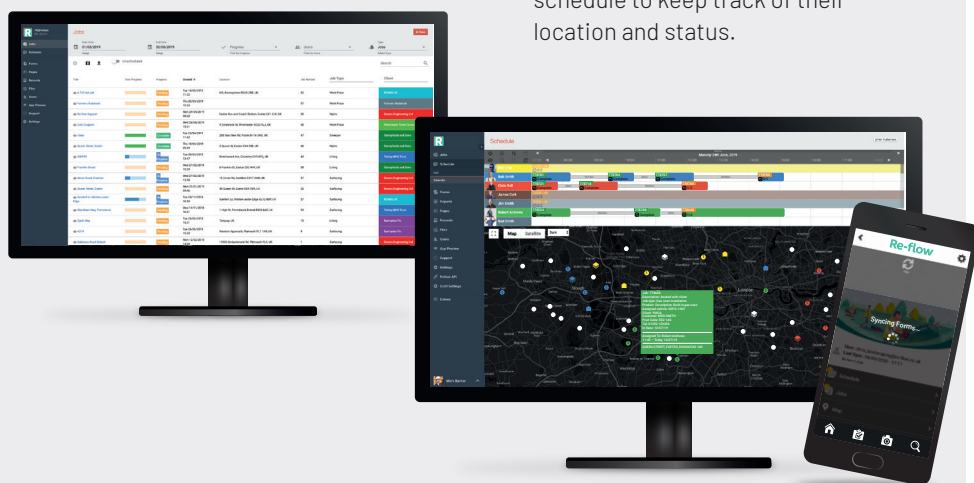

Features

Jobs and tasks

- Create jobs and tasks on the dashboard, add instructions, checks, materials and equipment. See current status of progress in real-time.
- Smart Sync all forms, plans and project documentation to mobile devices and instantly update if plans change.

Schedules and maps

- Assign map locations in the dashboard to reduce operative travel time and move the pin drop location without restrictions for ultimate accuracy.
- Drag, drop and assign all activities in the scheduler.
- Add your vehicles and plant to the schedule to keep track of their location and status.

Benefits

- Configure your preferred set-up, so Re-flow software can deliver the flexibility you need to be in control of your processes and operations.
- Reduce time spent on paperwork and compliance documents and save money by creating site and task specific forms using your own terminology.
- Stick to schedules, communicate better and improve overall job quality, productivity and profitability with instant connections and instant real-time dashboard overview of your entire workflow.
- Take control of the information exchange and ensure processes are followed, reports are returned and tasks are signed off.
- Instant evidence of your compliance for all business stakeholders and regulatory authorities. Robust reporting for even the most stringent audits.
- End-to-end financial management from inbuilt calculators that feed into bill of quantities (BoQs), quotes and invoices. All integrated with major accounting platforms.

"Our old management system was very heavily reliant on paper, which was slow inefficient and burdensome, so we had to find a much quicker efficient way of processing information. Now we've moved to Re-flow, information moves throughout the company and at the push of a button we're able to send information to staff and receive it back from them."

Will Stops
Managing Director, Landscape Services

Forms and workflows

- Integrate any form from ecological checks to chemical use logs, that auto-adapt in each job based on the information being inputted, so your operatives don't waste time or miss vital information.
- Users can complete workflows on location, on or offline and return instantly when signal is restored.

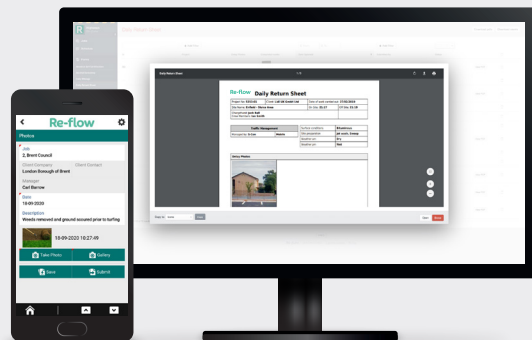

Photos and scanners

- Take photographs, mark-up and add measurements to eliminate confusion.
- Use the app to scan and record items with barcodes and QR codes straight into forms.

Sign and tag

- Auto-tag completed forms with time, date and GPS.
- Electronically sign, submit and store forms for compliance.

Quote and invoice

- Pull through all required information from materials and plant to the correct client addresses and logos to create quotes.
- Instantly manage the status and approve as invoices to reduce the time it takes for clients to pay.

Returns and reports

- Enforce checks, policy and process adherence, then see what is missing or incomplete.
- Export all reports such as staff or financial information including which vehicle or plant is requiring the most frequent or costly maintenance to help decision making on asset write down.

Data and system security

Our security processes include:

- Redundant firewalls
- Quarterly vulnerability scans
- Disaster recovery
- Advanced proactive uptime monitoring
- Server maintenance and OS patch updates
- Server admin access is restricted to our office static IPs and all staff laptops are encrypted
- Cyber essentials.

Our software platform and your data is hosted by UKFast and our servers are backed up multiple times per day on a 30-day retention. UKFast guarantees 100% network uptime and comes with the following certifications in the ISO certified, UK owned data centre complex in the UK:

- ISO 27001, 27018, 22301, 9001, 14001
- PCI DSS Level 1 Service Provider
- Cyber Essentials +
- BSI PAS 2060: Carbon Neutral
- CISCO CMSP
- G-Cloud 10
- PAS 2060 carbon neutral hosting.
