

Green-tree Roof Garden Intensive

Green-tree Roof Garden Substrate is an established growing media in the Green-tree family of products. A blend of lightweight aggregate and the award winning Green-tree Topsoil, the Intensive Roof Garden growing media is ideal for green roof construction projects and particularly containerised planting.

Lightweight in texture with good water-holding capacity, Green-tree Roof Garden Intensive guarantees healthy plants and trees in a roof garden environment.

Example bulk density at saturation point: 1.25 tonne/m³*

Green-tree Intensive Roof Substrate Offers:

- A typical pH of 7.5 making it ideal for a wide range of plantings
- Lightweight compared to standard soils.
- Excellent aeration properties
- Good water holding properties
- Good levels of fertility

Benefits of an Intensive Green Roof:

- Provides a bio diverse environment
- Retains water in times of drought
- Aesthetically pleasing
- Insulation properties
