

Over a period of eight years Lang+Fulton have supplied 63x66mm (Pleione) fencing to Coventry City Council for the provision of twelve MUGA sporting facilities to meet their programme of social and physical development within the community.

Lang+Fulton (formerly Orsogrill UK) were the first company to use grating material as a perimeter fence for Multi Use Games Areas. This experience together with invaluable feedback from the long association with Coventry's Department for Sport and Recreation have resulted in the attention to detail which is the hallmark of the present system with an emphasis on safety, durability and practicality.

Several of the installations have been sited in areas with a record of vandalism and anti-social behaviour. Regular inspections by ROSPA have certified that the robust construction of the Lang+Fulton system has proved to be almost entirely maintenance-free, testimony to the quality and resilience of the product.
