

Data Sheet

Eco Mix

Eco Mix is known to improve water retention and drainage capability, recommended by those looking to improve soil.

Elevate your garden and improve the soil fertility and structure with our Eco Mix soil improver.

Locally produced and recycled from Dorset gardens, the 12 week maturation process produces a sustainable and high quality compost, perfect to take your garden to the next level.

Expertly screened to 10mm, borders and veg patches will glow up, while trees and shrubs will thrive.

Spread the Eco Mix soil improver through the upper layer and root zone of your garden for the optimum results.

Input materials:	Biodegradable waste (plant matter & plant tissue waste)
Particle Size Distribution:	>100% passing a 7.0mm screen >90% passing a 4.0mm screen >50% passing a 1.0mm screen
Bulk Density:	500 – 600 g/litre
Moisture Content:	35% m/m
Dry Matter:	65% m/m
Organic Matter:	(as loss recognition) 25% of the dry matter
pH:	7.5 – 8.5
Electrical Conductivity:	400µS/cm
Purity:	Substantially free of physical contaminants, viable weed seeds and pathogens
Potentially Toxic Elements:	Within acceptable limits (“Heavy Metals”)
Certification:	PAS100 & the Compost Quality Protocol, in which this quality compost was produced in compliance with the Compliance Quality Protocol

User Benefits

- Peat-free soil improver ideal for breaking up heavy soils and adding organic matter to sandy soils
- Improves moisture retention and soil structure
- Nutrient-rich and an excellent source of organic matter helping plants establish quickly
- Easy to use and maintain
- This material is also available in a coarse grade which is screened to 20mm

Restrictions

Our Eco Mix Compost is not designed for use as a growing medium, a medium for planting acid-loving species or as a top dressing for turf.

Safe storage, handling, application & use of quality compost.
