

South Carriage Drive, Hyde Park

CLIENT & ARCHITECT: The Royal Parks, London

PROJECT FORMAT: Supply & Installation

ARCHITECT: Emily Alleway

COMPLETION DATE: 2014

BUDGET: £40,000

FEATURES:

Large bespoke jungle themed adventure unit.

PROJECT BACKGROUND:

The South Carriage Drive playground is very well used by the local community and visitors to the Royal Parks. However, due to it's popularity the play area has become worn and outdated in recent months. Jupiter Play was chosen to help improve it's future providing more creative play that would allow more children to play at once. Jupiter Play took part in consultation resulting in a preference for timber.

DESIGN CONCEPT & OUTCOME:

A large bespoke climbing unit which met all of the requirements from the consultation and the site itself was created to adhere to the Jungle Walk theme that was required of the multi-play unit. The unit was painted to fit it's surroundings and now includes green timber posts alongside the natural coloured robinia. This enhances the Jungle theme. A curved tube slide was also added to the unit with platforms, climbing and balancing features.

Alongside other new play equipment the multi-play FHS unit sits as the main focal point at Carriage Drive in Hyde Park extending the quality play facilities available.
