

Interactive play

Outdoor play for the current generation of children

Yalp encourages the new generation to play outdoors. actively, with the help of interactive play equipment. Even the young children of today carry mobile phones and are highly familiar with social media. Our children are growing into an increasingly digitized world. These societal changes also influence the ways in which children play. Interactive play equipment meets the demands of the youth - while tailoring to their underlying physical, social and emotional needs.

Did you know:
It takes 6.22 hours to burn off a Big Mac while watching TV, while it only takes 1.12 hours with playing Memo?

Calories burnt per hour:

Playing Memo: 440 kcal

Field Hockey: 428 kcal

Skateboarding: 285 kcal

Horseback riding: 228 kcal

Watching TV: 80 kcal

“Our most popular Sutū is played over 5.3 hours a day”

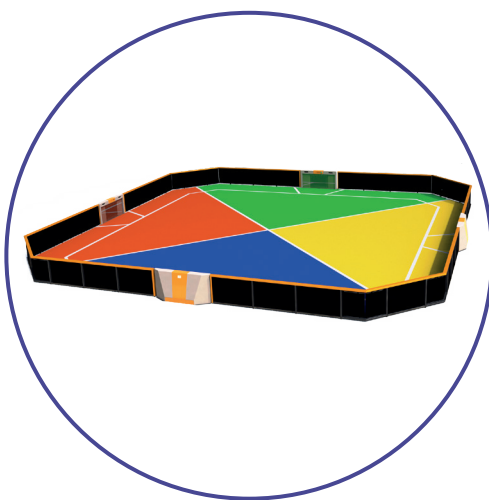

“There are more than 200 interactives installed in over 20 countries worldwide.”

“All interactives are built for the public space - completely weather-proof and vandalism resistant”

Interactive Dance Arch SONA

Sona stands for high play-value for an incredibly wide target audience. It is placed in many schools and elderly homes alike! The large orange arch and colorful play floor can be seen from afar. Numerous games can be chosen and played with one simple push of a button.

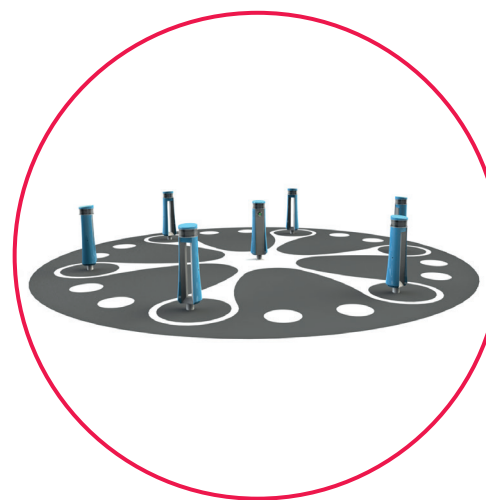

Interactive Sports Field TORO

This multi-functional sports field has replaced traditional goals with interactive ones. Vivid LED lighting and sound effects reward players when goals are scored and games are played.

Interactive DJ-booth FONO

The Fono is a DJ-booth for the outside urban space. The user puts any mobile phone onto the deck (no internet required!), which amplifies the music played. Effects can be added and music can be mixed. Fono can be expanded into a full scale outside hangout - including a dance floor and outside furniture.

Playful Learning MEMO

Memo is play equipment which allows children to learn in playful manner. Memo contains 7 interactive touch-screen pillars and an 8 meter playfloor. Games vary from new forms of 'tag,' to collaborative math solving and memory games.

Interactive Sports Wall SUTU

Sutū is a revolutionary football wall. Its 16 panels are impact-sensitive, and comes with at least 10 highly fun and addictive games. LED lighting and speakers give the player(s) feedback on their games and training progression. It even comes with built in radar for speed measurement.
