

► Conservatory Roof Access System

Features and Benefits

- Easily adjustable for both height and slope
- Quick and easy to assemble
- Anti-slip rungs
- Provides effective maintenance access
- Adjustable base for uneven sloping ground
- Lightweight and user friendly

Simple, safe and strong solution to access conservatory roofs.

Our Conservatory Roof Access System is a specifically designed two piece system for accessing conservatory roofs, or any glazed roof, for cleaning and maintenance purposes.

The horizontal access is supported across two glazing bars, and incorporates a kneeler with purpose built tool tray and bucket recess, to enable the worker a 'hands free operation'.

The vertical access section is attached with a suction cup to a suitable glazed window to prevent slippage, and also includes an adjustable foot stabiliser to suit uneven ground.
