2013
#4

Welcome...

With 2013 drawing to a close, we are reflecting over perhaps our most diverse year yet. With a constant eye on changes in seating, staging and teaching requirements we have launched our interactive seating range and added new staging platforms to the product range. Similarly this year has seen the full launch of our Spectator seating range, which is gaining momentum rapidly. With fresh products already on the horizon, 2014 is promising some exciting developments which we will share with you shortly! However we still have a lot to do before we finish 2013 and hope to see you at the Education Estates show at Manchester Central on the 26-27th of November where we will be exhibiting the latest of our seating and staging products.

Introducing the new...

avatar
ARENA AND STADIUM SEATING

After a successful launch of their Spectator Seating Range earlier this year, CPS have just unveiled the Avatar spectator seat.

The Avatar seat combines aesthetics, durability and economy and is set to become a favourite for stadium and arena's nationwide. It is a beam mounted seat made from extremely durable polycarbonates which takes up minimal space when installed.

Contact us for further information.

Alu Rapid Car Staging

The Alu Rapid staging system can accommodate vehicles and is ideal for all types of car showroom, exhibitions and shows.

The staging platforms can each support up to 1.5 tons in weight and the exceptional build quality is backed up by a Lifetime Warranty against manufacturing defects by CPS. The Alu Rapid platforms are suitable for indoor or outdoor use and available in a multitude

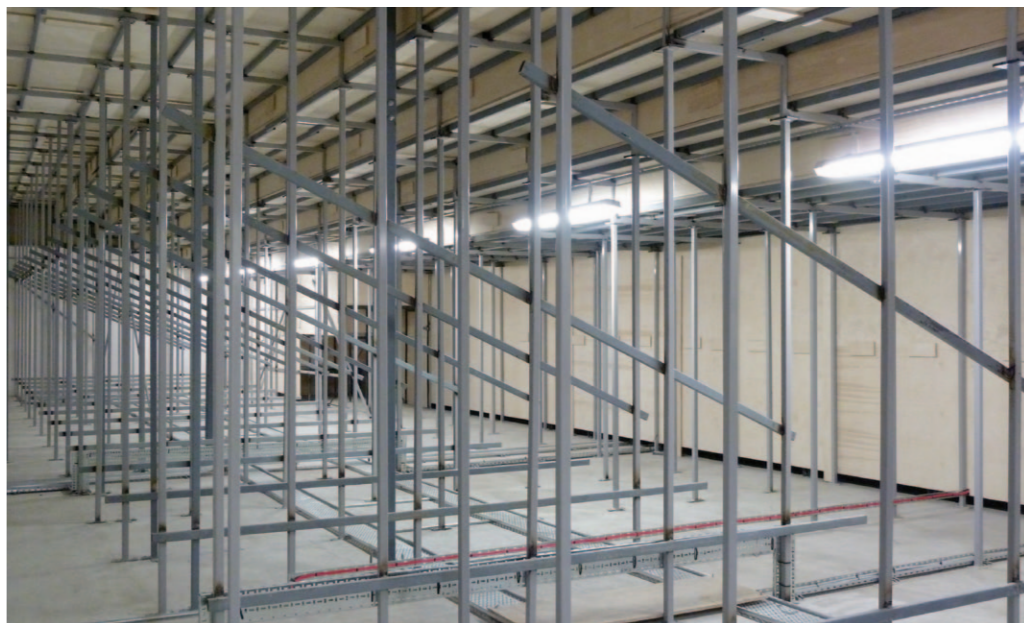

of finishes including timber, carpet and waterproof anti-slip. The staging can be customized to suit individual applications. Contact us for a no obligation quotation, demonstration or further information.

Excellence in Product and Service

www.cpsmanufacturingco.com

Structural Tiering & Flooring Systems

Complete structural tiering systems are designed to give integration throughout.

The advantages are speed of installation, space for heating and ventilation, minimal weight, rigid seat fixings bolted into M10 welded nuts under the structure and easy access for cleaning when step mounted seat frames are used.

CPS have a dedicated team who design the complete tiering system for most projects. We use either steel or timber tiering to provide the most appropriate systems, with safety always our number one priority.

Alu Plano Exhibition Flooring

When using Alu Plano you can install exhibition flooring quicker, with less manpower and still provide a perfect floor. The aluminium frame construction both protects the decking edging and also provides a very strong frame support. Alu Plano exhibition flooring is very sturdy in use and requires virtually no maintenance. Each module is height adjustable, even after the installation is completed, because of the Alu Plano adjustable foot system.

The Alu Plano uniquely folds away and therefore is very compact for transporting and storage. This also provides easier handling and reduced labour requirements. Alu Plano exhibition flooring is ideal for bridging over pipes and cables, levelling out on uneven floor and providing strong level surfaces for the stand construction. The floor can be adjusted from the top after the floor has been assembled.

Seating & Staging Exhibition

CPS will be showcasing their extensive product range including Lecture theatre, Auditorium, Conference, Spectator and Interactive seating systems. We will also be displaying our range of demountable staging, which includes platforms for every application.

CPS is also supplying the event with 3 stages for the exhibition which will be used in their theatres for lectures and seminars throughout the two days.

We look forward to seeing you there.

Customer Feedback

Thank you to you and your team for delivering a quality stage system.

Regional Estates Director

Just a quick thank you for the excellent service provided to support the University's Registration event during September. The prompt delivery and collection and high standard of equipment supplied, contributed to a successful event.
