

Welcome...

CPS are now well into the second half of the game of 2014 and are reflecting on one of its busiest years since the companies establishment 48 years ago in a small garage in Chesterfield. With an ever widening product range we have an increasing wealth of experience in virtually every type of seating or staging installation. Early September will see CPS exhibiting a wide range of staging solutions at The Venue Expo at Events City. We are always pleased to hear from you and appreciate any feedback or testimonials you leave.

Forty five years on and CPS are continuing to exceed the UK universities expectations.

CPS have now been supplying the Liverpool University for over 45 years and recently installed a demountable tiered seating structure for their newly renovated Performing Arts Centre. The structure included 8 tiers and incorporated the new Rapid Lock™ System - our

latest state-of-the-art stage connecting mechanism which makes it quicker and more efficient to connect. The demountable structure also incorporated our Alu Rapid V leg casting which gives the staging the capability to be built up to 1.68m without bracing.

Designer Fabrics

CPS supplies a range of designer fabrics for upholstery on lecture theatres and auditorium seats. The fabric can be used to create a multitude of different styles from pinstripes and polka dot to more outré effects!

Educational institutions have found in particular that a smarter learning environment increases the students respect and pride for their work space which in turn reduces vandalism.

Inova Interactive Seating - Lecture Application

New interactive teaching styles are increasingly becoming more popular throughout the UK and have accelerated the need for new interactive seating systems. Interactive seating used in the lecture application opens a whole new range of advantages over normal lecture theatres. The seating system allows students to interact with other students as the seats are able to swivel 360 degrees. The moveable

arm of the Inova system allows students to sit at their own comfortable distance from the desking but also means every student can face the lecturer. The chairs will return to a closed position when unoccupied keeping the lecture theatre clean and tidy while also finding favour with the fire officers as there are no obstructions from loose chairs. For further information please visit our website www.cpsmanufacturingco.com

Beam Seating - Just the ticket!

CPS have much to offer in the sports sector and have now completed a large number of spectator seating projects and many press conference seating rooms for stadiums. Pictured is the impressive stand at Headingley Stadium Leeds where CPS completed the seating in the room you can see in the centre of the stadium. We utilised the CPS beam seat within the project as the Stadium required something that could be taken out easily and stored.

The Venue incorporated staging which fitted over the tiers so the room could also be used as a flat floor as well.

Asset range flexibility and desking options.

The Asset has truly earned its name. Many multi-purpose venues have chosen the asset due to its flexibility to be used in the lecture theatre mode while being smart enough to be able to host business conferences. The Asset chair comes with a range of desking options which helps it to be used in a variety of applications and adapted to your own specific needs. The Asset seating range has a number of electrical power options including sockets and microphones making ideal particularly for conferences venues.

Is your school staging safe to use?

With performance time looming many schools will be beginning to think about pulling out their school staging, however is it safe to use? Many older staging blocks while not only being precarious for the performers can also be dangerous for those assembling and dismantling the staging systems. CPS offer a range of staging packages view our website.

Customer Feedback

Following an internal subcontractor interim review, I thought we should drop you a letter to thank you and your team for the first class service to date on the seating package here at the Lecture Theatre Complex. It's always a pleasure dealing with such professional subcontractors like CPS as in our industry all to many subcontractors let us down with promises they cannot achieve. At each stage of this package, from the initial tendering stage through the design stage, to actual works starting on site, there has been a seamless transition between the CPS departments maintaining a very high standard throughout. I look forward to our next meeting and the successful completion of your package and again thank you all for the effort to date.
