

Welcome...

As we pull away from the start line into 2015 CPS nears its 50th birthday. Operating now for over 49 years we have an unrivalled level of experience in seating and staging products.

From originally creating bench seating in a garage in Chesterfield we now manufacture an internationally recognised range of Lecture Theatre & Auditorium seating coupled with our Demountable Staging Systems. However CPS has not stopped innovating and have recently launched the Inova Interactive seating system and are the UK distributors for Daplast Spectator seating.

We'd love to hear from you whatever your project of problem, whether it's complex or simple, we will have a solution.

Flagship Interactive Lecture Theatre

CPS have just installed this flagship Inova Interactive lecture seating solution in to a new build college project. The seating system allows students to interact with each other which increases productivity and means the college can implement modern and innovative teaching methods.

This Interactive lecture theatre – as with many – was installed on very shallow tiers which means it easier for the students to engage in group work activity. The seating system meant the college could install several screens at the opposite end of the room and then with the use of movable dividers could split the room to increase the usability of the seating installation.

30 years on and still going strong...

This is one of CPS's most prestigious bespoke staging projects. As shown in the images the staging was cut to fit round the ornate stonework of the Guildhall walls. 30 years on after extensive use CPS have just finished refurbishing the staging system. Today CPS's bespoke staging capabilities are still at the same high standard and we are willing to listen to any of your ideas or concepts.

There's no need to break the piggy bank.

Are you looking to use up surplus funding before a new budget? CPS have a range of keenly priced staging packages which have been created with school budgets and school halls in mind.

Striking Harvard Lecture Theatre Installation

We have recently installed a new Harvard Lecture Theatre into a well-established UK university. Along with the Harvard layout the University also opted for striking designer upholstery as well as choosing a matching carpet design. Both CPS and Universities nationwide have proved that creative room designs increase students respect for the room which in turn reduces vandalism. The lecture theatre also has power outlets to every desk giving students the ability to use electronic devices.

Flexible Demountable Seating

Demountable seating is one of the most flexible seating solutions available, especially where the flexible use of floor space is high priority. Demountable structures allow the seating to be laid in a number of different formats whilst it can be converted to choir tiers or performance staging in a matter of minutes.

Thank you for the excellent quality of work in creating a lecture theatre at The King's School, completed yesterday. The tiered seating is outstanding. Extremely comfortable and looks 'the business'. The staff carrying out the installation of seating were fully committed, meeting all school requirements and beyond. Once again thank you for your support and we look forward to working with you again.

Business Manager

Our staging and seating units are working a dream. A huge improvement on the previous set up!

Town Hall Manager

We would like to thank you for all your help over the years in doing such a sturdy job.
