THE OUTDOOR DECK COMPANY

outdoor living

THE OUTDOOR DECK COMPANY transform outside spaces into practical and stylish outdoor rooms.

We are the country's leading decking company with more than **20 years of deck building experience**, designing and installing the finest outdoor rooms from concept to final completion ■ We employ our own expert nationwide construction teams using the highest quality timber sourced from managed and sustained forests ■ All our decks are **guaranteed against rot or any insect decay for 40 years**. No other company in the UK can offer this level of service and commitment ■ Each deck we install is as individual as you are ■ **No two decks are the same**

Decks are warm, dry and smooth underfoot. They make a safe, practical and inviting outdoor space

at its best

Decks made from Southern Yellow Pine

"**DURAPINE**"™ Southern Yellow Pine is regarded as the hardest and strongest pine in the world, with a beautiful grain and soft honey colour, unique to this species.

WHERE IS IT FROM?

We are the sole importers of **DURAPINE**™ Grade 1 Southern Yellow Pine from the famous **Cox Lumber Company** in Carolina USA. This is the finest pressure-treated timber available in the UK and guaranteed for a minimum of **40 years** against rot and insect decay, even with permanent ground and water contact.

A stylish modern deck, designed to echo the curves and angles of a classic Edwardian house, with storage for furniture and a 1.5 metre sunken Fire Pit with a beaten copper covering.

WHY DECKING?

Our timber decks are designed to create "outdoor rooms", typically on the same level as the interior floor. Wooden decking makes a **warm and comfortable** surface while creating a seamless transition between house and garden.

A deck makes the perfect solution for balconies or roof terraces. A raised timber deck will completely level a sloping site, or conceal an uneven or unsightly surface.

entertain

"A DECK REALLY DOES ADD VALUE TO YOUR HOME, AND THIS COX SOUTHERN YELLOW PINE DECKING FROM THE OUTDOOR DECK COMPANY IS ABSOLUTELY STUNNING"

CAROL VORDERMAN

We design and build decks to incorporate all existing landscape features including mature trees, plants and well-established wall climbers

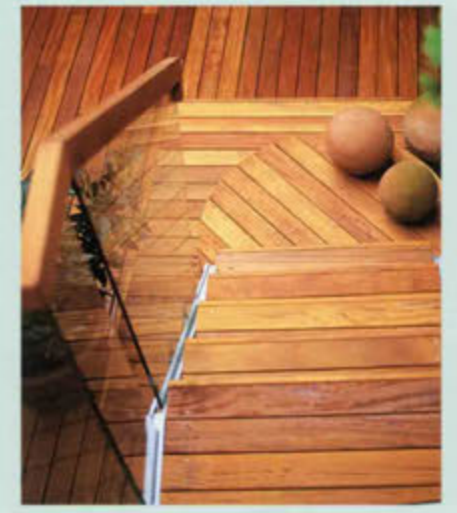

Fulfilling the desire for a nautical-styled deck, two oiled Iroko terraces were designed to create access to both basement and ground levels of this London house.

Decks made from Iroko

"DURADECK"™ straight grain Iroko is a naturally durable lightweight hardwood. Iroko is used extensively in decking in the UK and Europe, and is one of the classic timbers used for Pergolas and Gazebos.

transform

"MORE THAN EVER, I CAN SEE DECKING WITHIN A GARDEN BEING USED AS A HOME EXTENSION - THE ROOM WITHOUT A ROOF"

ALAN TITCHMARSH

An impressive raised terrace, designed as an extension to an existing kitchen creates the perfect outside room - ideal for entertaining and commanding the best views of the garden.

Decking has a natural affinity with water and here, on this riverfront roof terrace, the warm colour of lroko provides an attractive contrast to the galvanised metal gazebo and planters.

imagine

Decks made from Ip'e

Ip'e (*ee-pay*) from South America is an extremely dense hardwood, and regarded as the finest deck board in the world. Ip'e has a very tight grain and is virtually indestructible.

"THE GARDEN HAS BECOME AN EXTENSION OF OUR INTERIOR SPACE. THE TIMBER DECK, LIKE THE NATURAL WOOD FLOORING INSIDE OUR HOMES, IS FAST BECOMING A 'MUST-HAVE' CLASSIC"

LINDA BARKER

The fine colour and characteristics of Ip'e make a striking contrast against most hard landscape materials and water features.

enjoy

"INCREASED LEISURE TIME HAS MEANT THAT WE CAN CONCENTRATE ON QUALITY OF LIFE, AND OUR LIVING ENVIRONMENT HAS BECOME OF PARAMOUNT IMPORTANCE. THE TERM "OUTSIDE ROOM" HAS BECOME GENERALLY ACCEPTED AS A MEANS OF DESCRIBING A GARDEN. OUR DEFINITION OF THE VERY WORD "GARDEN" IS CHANGING AS WE UNDERSTAND THE IMPORTANCE OF THESE SPACES AS ENVIRONMENTS"

DAN PEARSON

AND THE ADVANTAGES?

Our decks provide an immensely strong and versatile alternative to stone paving, with a host of advantages other hard landscaping materials cannot achieve. Our decks will enhance your lifestyle and property value.

A spacious 10'6" deck wraps around this new family home and includes finely detailed steps and seating with storage.

inspire

Questions?

ARE DECKS SLIPPERY WHEN WET?

No. Brushing and regularly hosing down keeps a deck free from the natural garden debris which encourages algae growth and the cause of a slippery surface. A clean deck is only slippery when covered with ice or snow. Alternative timbers with textured surfaces are more difficult to keep clean as dirt and grime accumulates between the ridges which, in turn, promote algae.

IS THERE MUCH MAINTENANCE INVOLVED?

Minimal. All our timbers are either pressure-treated with preservative or are naturally durable hardwoods and require no further treatment. In order to maintain the overall appearance and give the deck its 'fresh' look, applying a deck cleaner every one or two years is recommended. If you prefer, our maintenance team will do this for you.

ARE DECKS SUITABLE FOR ROOF TERRACES?

Yes With our expert installation, decks can cover unsightly roofing materials and eradicate the typical 'puddling' or water pooling commonplace on most roof terraces.

IS INSTALLATION EFFICIENT?

Yes. Construction is fast and clean. The materials for a timber deck create minimal disruption, and do not require heavy equipment which is an important consideration where access to a garden or roof terrace is restricted.

CAN I DESIGN A DECK MYSELF?

Yes. From your ideas and lifestyle requirements we can create your deck incorporating other unique design elements such as lighting, fencing, balustrades, storage, steps, planters, and water features to name but a few.
