National  
Trust  
Landscape  
Collection

Inspired by tradition

'The National Trust has a diverse range of products for your home, garden and lifestyle. Made by the experts in the industry, we are proud to recommend these products that have been inspired by the special places, spaces and collections in our care. We partnered with Westminster Stone to create a range of paving and garden artefacts, because they offer wholly British manufacturing, are renowned for their authentic reproduction and can offer superb quality products at affordable prices'

Philippa Green, Brand Licensing Manager, National Trust.

*Next year, Westminster Stone celebrates 30 years at the forefront of product development in the landscape materials industry. World renowned for the quality & expertise of our traditional reproduction paving and flooring, we have evolved in recent years to incorporate an array of contemporary, ethically sourced natural stone paving products thus offering a comprehensive portfolio whatever your design requirements.*

*As a third generation family owned business, we're proud to be just a little different to our competitors in the products and levels of service we offer. This was recognised in 2011 by the National Trust, who awarded Westminster Stone the coveted licence to produce a range of traditional landscaping materials based on their properties & gardens. Now in its third year, the award winning National Trust Landscape Collection offers the discerning customer or garden designer a slice of heritage that is hard to replicate.*

*Whatever your style, we all need a little inspiration from time to time, and are delighted to bring you some of our ideas in the following pages. Take some time to explore, and discover why Westminster Stone raises the standard in both traditional and contemporary landscaping and flooring materials.*

**John Clifford**

## National Trust Landscape Collection

Inspired by tradition

Cotswold Manor

Country House

Roman Villa

Kitchen Garden

---

### National Trust landscape collection

The National Trust have been working together with established paving manufacturer Westminster Stone to create a collection of authentic paving and landscaping products, launched at the Chelsea Flower Show 2011. Inspiration for the collection has been drawn from the properties and landscapes cared for by the National Trust.

#### Cotswold Manor

The Cotswold Manor range takes its inspiration from the famous National Trust gardens at Hillcote and Snowhill. The range reflects the warm mellow tones of traditional Cotswold buildings.

#### Country House

The Country House range offers a touch of classic garden heritage inspired by the grandeur and formality of the nation's finest stately homes.

#### Kitchen Garden

The Kitchen Garden range is designed to reflect the traditions of these wonderful working gardens so often found at National Trust properties. It includes products with warmth and character suitable for many garden settings.

#### Roman Villa

The Roman Villa range of tiles and edgings captures the essence of the Mediterranean. The design has been inspired by Romano-British mosaics and paving at National Trust sites across the country.

For more information about the National Trust landscape collection visit: [www.nationaltrustpaving.com](http://www.nationaltrustpaving.com) or call 0844 815 6442

---

We've been dedicated to protecting our countryside and heritage since 1895 and these products have been carefully selected by Westminster Stone to meet our ethical and environmental standards. As a charity we rely on the public to help us look after this country's special places - for ever, for everyone.

Old Provence Star Pattern in Old Westminster and pale honey stone Tiles

Old Dutch Cobble, Old Lonsdale 600 Pops & Accrington Brick on Edge

## Westminster Stone Integrity

All products within the range are manufactured from through-pigmented, high specification, fibre reinforced reconstructed stone. Only raw materials of the highest quality, sourced wherever possible from the United Kingdom, are used in creating Westminster Stone to present authentically reproduced products second to none. All products are frost resistant.

## Dimensions and Weights

All Westminster Stone products are reproduced from natural materials enabling the finest detail to be accurately and authentically reproduced and consequently there will be a slight variation, (within tried and tested tolerances), in dimensions. This variation will enhance the overall natural effect. All dimensions quoted for reproduction materials and natural stones are approximate. Products are shown first in metric, with imperial following. Sizes quoted are nominal, and therefore show the area covered, including the recommended pointing gap, and not the actual size of the item.

## Colour variation

All products within the range are manufactured to look as natural as possible and, with this in mind, Westminster Stone have set out to achieve colour and tonal variation within accepted parameters. It is recommended that for projects requiring more than one pack, several packs are opened at once to enable you to benefit from the most natural instead variation available. Natural cutting and weathering can also affect the colour of materials, this too will enhance the overall natural effect. The LivingStone and PureStone natural stone products have a slightly wider colour variation which again will enhance the overall effect. They may also carry some attractive staining marks and a variation in texture.

## Surface drainage

Paved areas should be gently sloping away from any building to allow excess water to be drained away. Any base or ground preparation should also allow for drainage. Poor drainage may result in water retention and may affect the weathering characteristics of materials.

## Pointing

For best results, a strong semi dry mix is recommended (with sufficient water content to bind, but not so much as to stain product when used). Sufficient pointing material should be mixed to be used within around thirty minutes, less in warmer weather conditions; after this time it may become too dry to bind. Dry mix or sand for pointing may hold moisture for excessive periods, and staining may occur.

## Bonding

Natural stone in particular will benefit from a PVA type bonding agent to be added to the mortar when laying. Natural stone products, materials less than 35 mm (1 3/8") thick, and high traffic areas should be laid on a strong full mortar bed.

## Efflorescence

Westminster Stone cannot be held responsible for efflorescence, a naturally occurring phenomenon inherent in all highly cementitious products; this may temporarily affect the colour or tone, but will not affect the structural properties, performance or durability of the product. Efflorescence may manifest itself in the form of a deposit or an apparent fading of colour either in patches, runs, or covering the surface. The effects will gradually disappear with time, usage and once natural weathering takes over.

## Cleaning and de-icing salts

Westminster Stone will not be held responsible for

the effects of chemical cleaners, pressure washers or de-icing salts which may have a detrimental effect on the surface of all cements. Avoid the use of metal snow clearing tools too, which may also damage the surface of any wet cast concrete product surface.

## New products & Designs

At Westminster Stone, the policy is one of continuous improvement, and as such they reserve the right to change specification without notice. Applications have been made for name and design registration, and Westminster Stone claim copyright on all of their products.

## Health & Safety

Many products within the Westminster Stone range are heavy. It is suggested that items over 25 kg, or those that are awkward in shape should be handled by more than one person, or using suitable lifting equipment.

It is recommended that work gloves are used to prevent abrasion to hands, and lime burns from wet mortar. Eye protection should also be used when cutting with either chisels or disc cutters.

## Sealants

Westminster Stone or their appointed agents are able to give details of preparations, sealants and waxes for use when laying products outdoors, or for interior flooring.

## Photography

There is an intended variation within the Westminster Stone range, and photographs within this brochure are intended as a guide only. Colours within the brochure are as accurate as photographic and printing processes allow.

# Yorkshire Street, Lancashire Mill, Castle Blend &

**Yorkshire Street Flags** - Footworn and magnificent; these flagstones add an incomparable charm and maturity to any environment, both indoors and out, with subtle

hints of green and grey. **Lancashire Mill Flags** - Reproduced from hand selected stones from the floors of 19th century textile mills, we believe our Lancashire

Mill flags carry a special integrity; assured to add character and heritage to any project. **Castle Blend Flags** - Using the same character and authentic drilling,

# Old Cotswold, HênSlate & Old Farmhouse Flags

## HênSlate Flags

With a heritage that's as old as the hills, our reclaimed and faithfully reproduced Welsh slate flags bring timeless

appeal with a naturally weathered and worn appearance. **Old Cotswold Flags** Almost lost to the passage of time, we have reclaimed and

reproduced in fine detail these wonderful old flags from the heart of England. Rich in character and old-world charm they can also be used effectively in a contemporary setting.

Rectangular Flags (project packs only - not available in single sizes)

Consider Livingstone Limestone in Welsh Midnight Black, Tau Blue, or Honey Yellow (not all products are shown). Livingstone Limestone is available with hand cut edges for a quieter more contemporary ending or the

antiqued effect with gently rounded edges giving an aged time worn appearance. All products are supplied in random sizes and for ease of laying, each Project Pack will contain a simple laying pattern.

A further information sheet on the Livingstone natural stone range is available upon request
