Whatever you do...

If you can imagine it, i can do it.

The 920 is built with best-in-class core

features that allow you to control your

weighing process with unprecedented

efficiency. From there, it's up to you.

With a unique modular design and tools that

simplify custom programming, the 920 can be

and do exactly what your application requires.

What can the 920i do for 90UR operation?

And our at WWW.applied weighing.co.uk

applied Weighing International Limited manufactures and distributes a full range of process control weighing equipment. Visit our website for further information @ WWW.appliedweighing.co.uk

Standard Features

- Large 117mm W x 86mm H, 320 x 240 pixel back-lit LCD graphical display Selectable character sizes from 6mm to
- 30.5mm Display up to four scale channels with required Legal-for-Trade information per screen
- 32 individual scale accumulators · Five displayed soft keys with 10 user-defined
- and 14 preset functions per screen
- Front panel or serial configuration/calibration

Analog output selectable (0-10V, 0-20 mA)

Two channel serial (accommodates RS-232.

RS-485 and 20 mA current loop)

Communication protocol cards

Ethernet TCP/IP 10/100 Base-T module

2- and 6-card expansion boards

- NEMA 4X/IP66 stainless steel enclosure Four bi-directional communication ports
- Operator prompts

Option Cards

· Digital I/O, 24 channel

0-4 kHz pulse input

Memory, 1MB

DeviceNet

 Remote I/O Profibus DP

A/D dual or single channel

- Four on-board digital I/O
- 100 configurable setpoints Two option card slots
- 1000-ID vehicle registers for in/out weighing
- Programmable ticket formats ESP event-driven processing
- User programmable 128K flash
- Power for 16 (350 ohm) load cells per A/D option card

RS-232 RS-485

20 m A

DeviceNet.

Multiple screens (program control)

Universal Mount

A = 267mm B = 115mm C = 292mm

Wall Mount

Desktop

A = 267mm B = 216mm C = 115mm

Panel Mount

A = 231mm B = 127mm C = 295mm

Enclosure Options

Common Applications

Model-Specific Features

- 360° mounting configuration
- Accommodates 2 option cards internally (up to 14 total)

Model-Specific Features Space for manual overrides

· Industrial indoor/outdoor

Common Applications

Control systems

Material handling

- Accommodates 8 option cards internally (up to 14 total) Accommodates internal relays

Common Applications Data entry

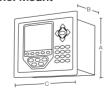

· Weighbridge

Office environment

Model-Specific Features Ergonomically efficient

- Accommodates 2 option cards
- internally (up to 14 total)

Common Applications Process control Retrofit existing panels

- Custom consoles Model-Specific Features
- Optimizes panel space Accommodates 4 option cards internally (up to 14 total)

PROGRAMMABLE INDICATOR/CONTROLLER

Whatever you imagine... i can do it easier, faster and smarter.

Simplicity, ultimate flexibility, infinite power. i am different.

les, the revolutionary 920i is indeed different. vet intuitively familiar for even the least experienced operators.

The 920i is truly the first of its kind

to blend revolutionary user interfaces, total

flexibility and ultimate processing performance with the simplicity of a basic weight meter. • We took several key features from weight instruments, PLCs and computers, incorporated robust state-of-the-art electronics and wrapped them in virtually indestructible packaging options to deliver the most advanced programmable instrument the industry has ever seen. • Adding an entirely new dimension in flexibility for solution providers and users alike, the 920i delivers

simplified customisation at a fraction of the cost of traditional process

instrumentation. From tailored "basic" weighing, to complex process

automation, the 920i gives you exactly what you need, exactly the way you want it. i am intelligence. While most programmable indicators/controllers can run complicated programs, operating them can be equally difficult. The 920i's intelligent design has changed all that. We've combined performance-driven circuitry, simplified architecture, and intuitive features to provide an instrument that offers virtually unlimited power, yet is remarkably

Customised soft keys put increased productivity at your fingertips. Programmable keys provide instant access to frequently used functions such as selecting a formula, starting a batch, beginning a data collection sequence, or searching or sorting a file. They can be redefined throughout a program, providing a virtually unlimited number of soft keys. When your process changes, soft key functions can easily be modified in the field.

Data acquisition and storage play a vital role in successful supply chain management. From simple transaction and inventory records to complex data manipulation, the 920i will help you manage critical information in a way that best fits your process. Battery-backed memory allows you to customise database files to store information like ID numbers, transactions. formulas, label formats, and PLUs. With up to 14MB of optional memory, the 920i can house multiple database files or allow you to download information to a standard data management software program on your PC.

Your window of opportunity to a new dimension

increases efficiency and

Event Sequential Protocol The most advanced processing technology in the industry.

NFMA 4X/IP66 Heavy-duty, stainless steel enclosure for enhanced protection in

harsh environments.

For program controlled functions, the 920i has removed the slowest step in the internal process-language compilation. When teamed with the latest industrial chip technology, the result is extremely efficient processing.

Multi-tasking at the speed of i. Until now, performing even simple weighing operations while running a program put your operation into slow motion. We've changed all that with technology we call ESP (Event Sequential Protocol). Similar to computer processing technology, events are identified, prioritised and executed by handlers with unprecedented efficiency. In the time it takes most other programmable instruments to loop through a process cycle and address a single random resource demand, the 920i has already executed a sequence of critical tasks in order of highest priority.

i am flexibility. The rapidly chang-

ing business climate requires products that will meet today's needs and evolve to exceed tomorrow's demands. The 920i's modular design allows you to choose only the options necessary for your current application. yet leaves room for future expansion. Whether your process requires multiple scales or connection to other peripherals, the 920i offers a full range of options** to get the job done:

- Up to 28 A/Ds (scales) and 32 channels
- Up to 340 digital I/O
- Up to 32 serial ports
- Up to 14 analogue outputs

Easily integrated into new or existing automation systems, the 920i provides open connectivity to the most popular networking interfaces. In fact, with the ability to communicate with and control your other indicators, it per-
