Our Ethos

Environmental stewardship is at the heart of everything we do.

Our responsibility extends far beyond a hope for a cleaner environment. We are striving for a world where recycled plastic has endless possibilities.

Sustainability underpins our product designs and the way we run our recycling and remanufacturing operations.

*As part of our commitment to manage the resources that we use in our production, Plaswood operate a **TAKE BACK SCHEME** on our products that have served their useful life. All eligible products are capable of being returned to our recycling facilities and be re-used into new Plaswood products to be enjoyed by future generations. T&C's apply, for more details please contact Plaswoodsales@rpc-bpi.com

What we do

Plaswood offers a high quality, innovative, durable range of recycled plastic products and solutions that are made from recycled plastic and are recyclable*.

Innovation

We are proud of our continuous investments in innovation and in people which enables delivery of a competitive product and sustainable growth.

Sustainability

Our recycling processes are transforming waste into new supplies and solutions making the planet safer, greener, and better for future generations.

Quality

Plaswood products and raw materials are tested by independent experts, because we understand that performance and consistency are fundamental to our customers.

Features

Unlike wood or steel, Plaswood is impervious to all weather, it is rot resistant, splinter free, moisture repellent and maintenance free.

The Circular Economy

Our process engineers are continuously working on developing sustainable, efficient recycling and re-manufacturing processes that support and develop the circular economy.

Plaswood recycling and remanufacturing process

All Plaswood products are manufactured from recycled plastic and are recyclable*

Therefore when you are ready for something new Plaswood can be re-recycled and remanufactured into third, fourth, fifth... life product. Our customers can enjoy our product range for years to come, knowing that it is kind to our environment.

*As part of our commitment to manage the resources that we use in our production, Plaswood operate a **TAKE BACK SCHEME** on our products that have served their useful life. All eligible products are capable of being returned to our recycling facilities and be re-used into new Plaswood products to be enjoyed by future generations. T&C's apply, for more details please contact Plaswoodsales@rpc-bpi.com

1. It all starts here at Dumfries when the plastic waste arrives at our recycling and remanufacturing plant
2. Prior to the recycling process the material is quality checked
3. All plastics are shredded
4. To remove all contaminants and odour the shredded material is washed*
* The water we use is being treated and re-used, when compared to production of virgin plastic this remanufacturing process reduces water usage by a whopping 90%.
5. Clean flake/crumb is dried and quality checked
6. Once our experts are satisfied with the quality of the raw material it is melted and ready to be blended
7. The blend composition is critical to the technical properties of our product, which is why we choose our blend ingredients (raw materials) very carefully
8. The blend mix is quality checked
9. Molten plastic material is extruded into recycled plastic lumber profiles – Plaswood
10. The extruded Plaswood will rest and cool for a period of time depending on profile size
11. Cooled profiles are exposed to rigorous quality control and technical tests to ensure they meet our quality standards
12. Subject to passing quality control, the profiles are ready to use
13. Plaswood profiles are ideal for fencing, decking, furniture, raised beds, planters, boardwalks, revetment walls and more...
