SMIM005 / SMIM015 / SMIM030 GRINDING

THE ROTOR INSIDE THE SMIMO GRINDER PULVERIZES ORGANIC MATTER TO A HOMOGENEOUS PUMPABLE PULP.

A sieve inside the hammer mill ensures that the product is only discharged once the particles have the required size. Parts can easily be exchanged and the SMIMO masher is very resistant to aggressive products and substances.

Since the early nineties our SMIMO grinders have frequently been applied in the animal feed and recycling industries. The grinders are suitable for processing potatoes, fruit, vegetables, and food-stuffs to a pumpable substance. This makes them ideally suited to create the right feed products for animal feed and fermenters.

TECHNICAL DATA

- ▶ POWER: 11kW TO 55kW
- ▶ R.P.M.: UP TO 3000
- ▶ CAPACITY: UP TO APPROX. 120m³ PER HOUR
- ▶ SIEVE MESH SIZES: 2mm TO 30mm
- ▶ DIMENSIONS: 1520x760x970mm TO 3966x2429x1539mm
- ▶ MATERIAL: STAINLESS STEEL 304
- ▶ AVAILABLE WITH PLC AND/OR SCADA CONTROL
