SMIDE4 / SMIDE5 / SMIDE6 / SMIDE8 SHREDDING

SMIDE SHREDDERS OR COARSE CUTTERS
CUT POTATOES, FRUIT, VEGETABLES,
FOODSTUFFS AND RESIDUAL PRODUCTS
INTO SMALLER PARTS.

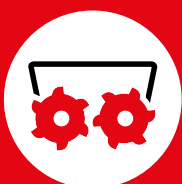

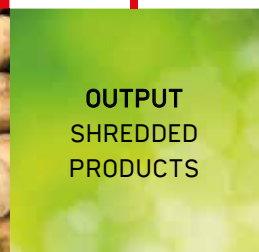

As a result, organic products are easier to pump and to process. The shredders are available in both a single- and a double-shaft execution. The machine is of modular design, so that the product size can be set by adjusting the pack of blades. Since the early nineties the SMIDE shredders have frequently been applied in the animal feed and recycling industries. Furthermore, SMIDE shredders are used to prepare flows of organic matter so that these are suitable for processing in fermenting and composting installations.

TECHNICAL DATA

- ▶ POWER: 1x4kW TO 2x18.5kW
- ▶ R.P.M.: 40 TO 100
- ▶ CAPACITY: UP TO APPROX. 100m³ PER HOUR
- ▶ INLET OPENINGS: 340x280mm TO 676x460mm
- ▶ DIMENSIONS: 1421x370x270mm TO 3164x780x350mm
- ▶ MATERIAL: STAINLESS STEEL 304
- ▶ AVAILABLE WITH VARIOUS BLADE TYPES AND BLADE SIZES
- ▶ AVAILABLE WITH PLC AND/OR SCADA CONTROL

INPUT
POTATOES, FRUIT,
VEGETABLES,
