

Play value

Round spring platforms are mounted on strong, low springs. It is not only fun to jump on them, but one can jump off the disc in any direction, as from a spring-board. The momentum which is enforced by the springs propels the jumping child quite far. Jumping from one disc to the other represents a special sequence of movements and a challenge for small children. Therefore the installation of at least two Jumping Discs is recommended.

Fundamental characteristics

- wooden surface with natural structure for a good grip
- incentive for playing: round, low wooden plate, springs
- movement: jumping up and down, jumping off, hopping

Suitable

- for children from 4 years
- for public playgrounds
- institutions for children
- school playgrounds
- parks
- outdoor swimming pools
- as play offer alongside paths

Jumping Disc
with pre-cast foundation

6.06000

Safety check according to EN 1176

Components

- 1 disc complete with 3 springs
- 1 pre-fabricated concrete foundation

Installation information

Surfacing requirements corresponding to a fall height of < 0.60 m (please refer to price list for more detailed information)

Foundations

For installation in loose material, an additional anchorage in concrete is necessary on-site.

Attention:

Exact measurements may vary, for all installation dimensions refer to current installation instructions.

Technical changes reserved.

Technical information

equipment of mountain larch, selected according to eight quality criteria

core-free timber

sawn-timbers of mountain larch, core-free, measurements refer to wood before planing

top of 45 mm boards, screwed together with expansion joints

coated springs, standard colour red

fastening elements galvanised

Dimensions

(small deviations possible)

height	0.35 m
diameter	1.00 m
weight approx.	140 kg

For more detailed explanation of the quality characteristics see price list.
