

Function and Play value

Sound behaves in similar ways to water which is why it can be directed through tubes as was done in old ship's telephones. Between two and four speaking/ listening stations can be installed and these are connected by underground pipes and a special sound distributor. It is possible to communicate over unusually long distances without the use of any electronic amplifiers. However, visual contact makes sense.

Suitable

- for parks, therapy gardens, schoolyards, playgrounds

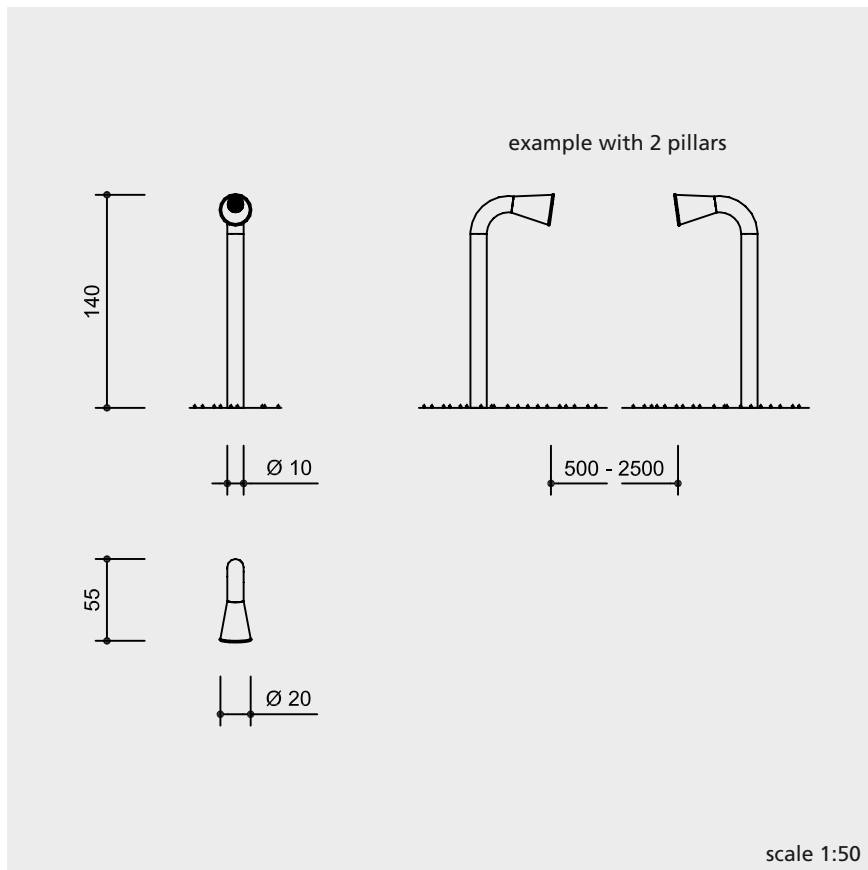

Conference
graubner Play Stations for
Developing the Senses

Acoustic effect	soft
Vandalism	not vulnerable
Supervision	not necessary
Explanation board	not necessary
Installation	indoors and outdoors
Safety check (EN 1176)	not necessary
Installation in concrete	not possible

10.55000

Technical information

pillar made of stainless steel

cone shaped opening with perforated sheet cover

Dimensions

(small deviations possible)

height 1.40 m
 tube diameter 0.10 m
 speech and listening tube depth 0.20 m
 0.55 m

weight approx. 21 kg per stele

Components

depending on the number ordered
 2 - 4 pillars with coupling

minimum number is 2 pillars

On-site work

supply and installation of the required underground pipes as well as the ducting for connecting materials according to our specifications

Installation information

Recommended space
 circle diameter 2.00 m per pillar

Foundations
 1 item 60 x 60 x 70 cm per pillar
 excavation depth 90 cm

Attention!
Exact measurements may vary, for all installation dimensions refer to current installation instructions.
